

# ROLLER BLINDS

Complete systems, components and control options

## Interior Roller Blinds

- + motors
- + automation
- + 3rd party BMS integration

Our commercial grade roller blind systems are made-to-measure to your project requirements using high-performance technical fabrics.

- Anti glare
- High quality components
- Efficient installation
- Multiple fabric choices
- Excellent solar properties

## MOTORISED CONTROL

Motorised blinds can be controlled at various levels of sophistication, from wall switch, remote control or BMS system integration. i.e. KNX, LON and BACNET IoT connected blind control.

- Digital SMI Motor
- Radio Motor
- Battery Motor
- Electrical Motor
- Mechanical Motor

## AUTOMATION

- KNX & BMS network integration
- Solar path timed control
- IoT digital motors
- Future proof software

Find out more information on our automation features.

## VASATEC SMI - DIGITAL MOTOR FEATURES

**Precise Alignment**  
commands for exact movement and intermediate positions.

**Plug-and-Play**  
Simplified installation with pre-made components.

**Status Feedback**  
Motor position, condition, upper/lower limits, temperature, error messages.

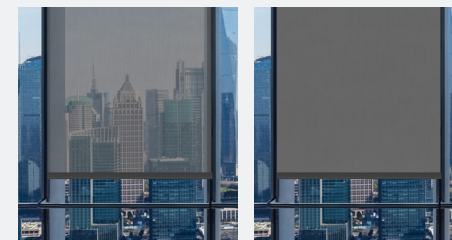

**Individual Control**  
Motors controlled independently of wiring configuration.

**Parallel Connection**  
Up to 16 motors in parallel connection.

## FABRICS

Vasatec offers an extensive collection of Roller Blind textiles in screen, room darkening and reflective backed fabrics. Our technical experts can offer detailed advise and together select the right fabric for your application.

- Cradle-to-cradle / Eco-friendly options
- Various light transmittance options
- Room darkening fabrics
- Large selection of colours and textures

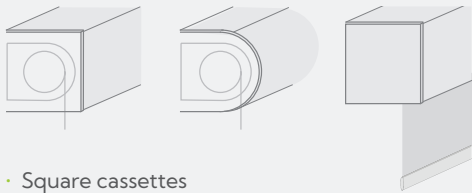

## BRACKETS

### MOUNTING PROFILES

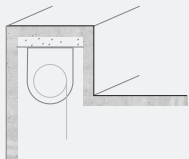

- Wall fixing brackets
- Ceiling fixing brackets
- Double blind brackets – wall/ceiling fixing

### CASSETTE SYSTEMS

- Square cassettes
- Round cassettes

### RECESS CONCEALMENT BRACKETS

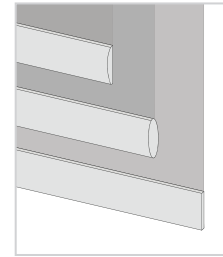

- Various concealment bracket systems
- Neat concealment for ceiling recess spaces
- Custom cover plates for a flush ceiling finish

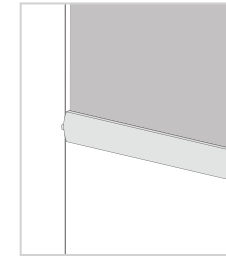

### SYSTEM SIZES

Depending on the width and drop of each roller shade, the roller tube and bracket sizes will be determined to accommodate various factors such as the size and weight of the fabric, motor, and the desired level of tension, including the specific requirements for installation.

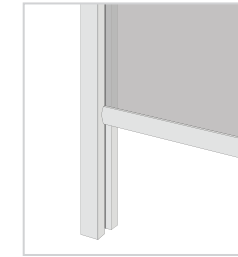

## ACCESSORIES

Base bars

Guide Wires

Side Channels

Component options can be tailored to your preferences and project requirements.

For more information on bracket and component options including dimensions, sizes, colours and other technical specification details, please contact your local Vasatec dealer or sales representative.

Vasatec is an independent consultant in planning and delivering all-inclusive shading solutions to meet the unique demands of each project.
